PROJECTS

PORTFOLIO

My personal portfolio website

[HTML, CSS, JavaScript, React, Material UI, styled-components]

My personal portfolio website contains all the information from this CV and some more data plus all of my projects.

MEMORY GAME

Memory game based on matching cards

[HTML, CSS, JavaScript, React, Material UI, styled-components]

A game designed to train user memory by remembering and matching the same cards in a pool. Customizable card type and number. Theme changer and audio effects included.

WEATHER

Web application to track weather

[HTML, CSS, JavaScript, React, Material UI, styled-components]

Web application to track weather with help of OpenWeather API and custom React hooks.

PLANETS

Planets fact site

[HTML, CSS, JavaScript, React, Material UI, styled-components]

A beautiful website that showcases a bunch of facts about the planets of our solar system. Animated with framer-motion, styled with styled-components.
